

Stripe – Account Creation & API Keys Tutorial

This document explains how to create a Stripe account and retrieve your public and secret API keys. These keys are required to integrate Stripe payments into your application.

1. Create a Stripe Account

Follow the steps below to create your Stripe account:

- 1 Go to <https://stripe.com>
- 2 Click on the “Start now” or “Sign up” button.
- 3 Enter your email address, full name, and create a secure password.
- 4 Confirm your email address using the link sent by Stripe.
- 5 Complete your business information (country, business type, name, etc.).
- 6 Add your bank account details to receive payments.
- 7 Complete identity verification if requested by Stripe.

2. Retrieve Your Stripe API Keys

Once your account is created and verified, you can access your API keys.

- 1 Log in to your Stripe Dashboard.
- 2 In the left menu, click on “Developers”.
- 3 Select “API keys”.
- 4 You will see two main keys:
 - 5 • Publishable key (Clé publique Stripe) – used on the client side.
 - 6 • Secret key (Clé secrète Stripe) – used on the server side.
- 7 Click “Reveal live key” to view your secret key.
- 8 Copy and store these keys securely.
